- 4 Q. That's an accrual of the potential 5 performance rebate that might be earned by the 6 end-user customer, right?
- 7 A. Correct. And it could also have the GPO 8 fees in it as well.
- 9 Q. Okay. But the charge-back itself doesn't 10 go in there?
- 11 A. No.
- 12 Q. And then the ultimate process of

MS. CITERA: Object to the form.

- A. Dave was looking for a source in the hospital contract marketing area for HPD and he knew me and he knew I could help identify how we could get those list prices changed.
- Q. (BY MR. ANDERSON) So all in all you did feel like you were qualified to assist in changing the list prices, correct?

MS. CITERA: Object to the form.

- A. I would say I -- I -- since this was one of the products within the injectable arena that was part of my responsibility, that I would be able to find how we could go -- who actually could make the changes and 15 how we could get those done. 16
- 17 Q. (BY MR. ANDERSON) And -- and who was it that 18 you thought you needed to contact to make sure these 19 list price changes were done correctly?
- 20 A. Based on my recollection, I thought it was 21 the marketing manager that I would consult with and get his approval and then run it through the system.
- Actually have, then, the changes implemented by Jerrie 24 Cicerale.
- 25 Q. And, in essence, that's what happened, you

1 Q. (BY MR. ANDERSON) Harry Adams?

- 2 A. It may have been Harry Adams.
- 3 Q. Is there anybody else that you believe was
- 4 the one who contacted you and said that list prices 5 only changed on an annual basis?
- 6 A. I -- you know, to my knowledge it was -- it
- 7 most likely would have been Harry. 8 Q. And is that what you were doing in Exhibit
- 733 where you're writing to Harry and others and --9 and proposing new Vanco list prices that are higher 10
- 11 than the ones that you initially suggested back in

12 March of '95?

13 MS. CITERA: Objection to form.

- 14 A. This Exhibit 733, this possible spreadsheet
- that I did, it appears that the person was suggesting 15
- 16 the new list prices from a May 4th meeting.
- 17 Q. (BY MR. ANDERSON) And do you know, sir, why
- 18 it is that you were suggesting that the new list
- prices be an average of the prior list prices and the 19
- suggested prices that you had recommended back in 20 21

March of '95?

- MS. CITERA: Object to the form.
- 23 A. You know, I don't recall what the thought
- 24 processes were or, again, if, in fact, that -- that
- was my spreadsheet as to how that rationale came

MS. CITERA: Object to the form.

- A. I don't recall what the end point was. I do remember sending the information to Jerrie. I don't recall if the changes were ever made or that they were reversed back.
- Q. (BY MR. ANDERSON) Well, you mentioned reversed back. Do you have some memory of the fact that the prices did not stay at the lower levels that you suggested?

MS. CITERA: Object to the form.

- 15 A. To the best of my knowledge, what I recall 16 was someone from the hospital side came back to me in the Trade Relations area and said that we don't change 17 18 list price except through the annual change process. So I said, okay. I went back to Dave, from my 19
- 20 recollection, and told him that we need to change
- these back. And that was my recollection, that we 21
- 22 moved them back to where they were originally.
- 23 Q. (BY MR. ANDERSON) Who told you that? 24 MS. CITERA: Object to the form.
- 25 A. It may have been our Trade Relations manager.

- someone, most likely Harry, came to you and said, 4 5
- "Mr. Eichhorn, we don't change list prices during the 6 middle of the year. We only do that on an annual
- 7 basis"; is that correct?

MS. CITERA: Objection to the form.

- 9 A. That would have been my understanding that 10 someone would have come to me and said, you know, we
- 11 don't change the list prices, so we need to change
- 12 them back.
- 13 Q. (BY MR. ANDERSON) Well, if that were the
- 14 case, sir, why didn't you in or about May 5th of '95
- 15 just simply suggest that the prior list prices be
- reinstituted as opposed to suggesting an average list
- 17 price?
- A. You know, I don't recall why or how those 18 19 conversations took place.
- 20 Q. That doesn't really seem to add up, does it? MS. CITERA: Objection to form. 21
- 22 A. What doesn't add up?

- A. As I understand reading deposition testimony and talking with people, that Abbott did not create spread.
 - Q. How -- Why do you say that?
- 8 9 A. My understanding is that Abbott would 10 have provided pricing information to the compendia, and the compendia then ultimately issued -- issued 11 the pricing information. To the extent the spread 12 would have been created, that would have created 13 14 the spread.
- 15 Q. But Abbott understood that there was a correlation between the provision of its list price 16 information to the price reporting compendia and the calculation of AWP, correct? 18

the prices. It will have an AWP price, a direct

2 price or WAC price. If there's not a price it'll

- just be blank in any of those categories. And then
- the system, the application itself -- from my recollection -- it's been a while since I've used

it. But it will determine a FUL price where it can. 6 7 Then we apply some manual review just to

8 assure we have -- there's some edits and I can't

- remember all of those. But we want to make sure 9
- 10 that it's using -- because it's supposed to use the
- lowest price in published compendia, and we want to 11
- 12 make sure that that lowest price is a true price,
- that it's using a true price to establish a FUL. 13
- So there's a manual review that's applied 14
- to some of the drugs where the pricing might not 15
- look right in there or there's missing pricing. But 16
- basically there's a lot of manual review that's 17
- included before the final FUL listing will come out. 18
- 19 Q. Okay. I appreciate that. I'm going to
- 20 try to follow up on each of those steps as best I
- can. You indicated that there was a system

- A. It's an application.
- 2 Q. I think I've seen some documents that
- 3 indicate the FUL process was computerized?
 - A. Correct.
- 5 Q. Right? Is that what you're talking about
- when you talk about the system? 6
- 7 A. Yeah. It's an application that they use.
 - Q. And what kind of application is it?
- 9 A. I'm not a techie person. I don't know.
- It's on the computer. It's an application. I don't 10
- know what more -- how to describe it. 11
- 12 Q. Was the application set up before you
- started working on it or did you --13
- 14
- Q. -- take part in setting it up? 15
- A. When I first started working on FULs it 16
- was in our mainframe. The activity would occur in 17
- our mainframe. They took it from the mainframe and 18
- put it into an application that they can use on the 19
- computer, if that helps. 20
- Q. And do you recall -- was there someone --21
- you mentioned systems folks. Was there somebody at 22 22

Page 236

- 1 CMS in the systems department that was involved in
- 2 this?
- 3 A. In the switch to the new application?
- 4 Q. Yeah. And basically the FUL program in 5 general. Who was involved in loading data --
- A. The systems support was Dona Kaufman. 6
- 7 D-o-n-a.
- 8 Q. Was there anyone else you recall or was 9 she the primary person?
- 10 A. There was someone before her, but he no
- longer works for CMS and I can't remember his name. 11
- 12 But she was the main one for the new application.
 - Q. Do you know if she's still there today?
- 14 A. Yes.

- 15 Q. Do you recall when the new application --
- when you moved from the mainframe to the new 16
- 17 application?
 - A. Time?
- 19 Q. Yes. When that happened.
- 20 A. After '95.
 - Q. Prior to 1995 was the process still
- 22 computerized bringing in information from the

Page 237

- compendia and that kind of information?
 - A. It was brought into the mainframe.
- 3 Q. Just brought into a different computer in
- other words? I'm not a techie either. 4
- 5 A. I'm just saying mainframe because that's
- 6 what I know.
- 7 Q. And do you know what the application is
- 8 called?
- 9 A. FULs.
- 10 Q. FULs. Now, the Orange Book has a place
- 11 in this process, correct?
 - A. Right.
- Q. And could you tell us what the Orange 13
- Book is and what impact it had? 14
- 15 The FDA Orange Book. It lists the drugs
- 16 that are grouped by the FDA. If you have an Orange
- Book available, I think they have on the front 17
- 18 page -- yeah -- the Orange Book can explain it much
- better than I can. But -- yeah. 19
- 20 Q. I'm handing you our only copy of the
- 21 Orange Book.
 - A. But they get this electronically and it

Page 246 that injectables and other products many times are 2 provided in a physician's office and other type of settings where they might not be claimed separately. They might be included in a payment, like a physician payment. 6 Also, injectables, many times when they're billed on the claim form they're not --7 8 they're billed with codes rather than NDC numbers, 9 which means that the states may not be paying for 10 them through their pharmacy benefit but through 11 another means, such as a physician's visit or a hospital or something like that. 12

So many times what we're trying to do with the FULs is use most commonly used drugs and covered outpatient drug type, so like tablets and capsules.

- 17 Q. Is there anything in the regulations or statutes that limit the FUL program to tablets or 18 19 capsules or other drugs that are commonly administered in the outpatient setting? 20
- 21 A. Not that I know of.
- 22 That was just the -- when you started

Page 247

working on the FULs that was just the way that HCFA 2 approached it, you did not establish FULs on the 3 injectables? 4

- A. Correct.
- 5 Q. And did you ever receive any explanation 6 about why that was?
- 7 A. I can't say specifically there was an 8 explanation. I think you learn this as you work 9 with the program.
- Q. But you would agree with me that the 10 11 Orange Book page that I showed you does show that in 1996 there were at least two versions of vancomycin 13 that were rated A in the Orange Book? 14
 - A. Correct.
- 15 MS. MARTINEZ: Objection, form.
- Q. And so -- I want to get back to this 16 17 computer business. Was the computer program 18 specifically designed to not include injectables or how did that work? 19
- 20 A. You'd have to talk to the data folks. We 21 were not including injectables. I don't know what

criteria they put in there.

Page 248

Q. Because if the initial identification of drugs that satisfied the criteria was just two or more A-rated drugs or three or more A-rated drugs if one of them was not A-rated, and that was done by computer presumably that would bring in injectable drugs like vancomycin, right?

MS. ALBEE: Objection.

- 8 A. No. There are still more criteria. You 9 still have the Orange Book criteria, but there are 10 still criteria that the systems folks put in to look 11 for the type of drugs that the FUL prices are set 12 on.
- 13 Q. So is it your understanding that HCFA specifically set up the computer program to identify 14 and exclude injectable drugs? 15

MS. MARTINEZ: Objection, form.

- 17 A. In one part of the process, yes.
- Q. And do you know in what part of the 18 19 process that was done?
- 20 A. No. I don't.
- 21 Q. Did you have any part in that process of 22 either manually excluding the injectables drugs or

Page 249 setting up a computer program such that those drugs

would be moved aside? 3 A. The basic criteria for the system was

- 4 developed before I got there.
- Q. Who would be the best person to ask about 5 6 why it was that injectables were specifically 7 excluded from the FUL program? 8

MR. WINGET-HERNANDEZ: Objection, form. MS. MARTINEZ: Objection, form.

- 10 A. I don't know. Pete Rodler was the first 11 one I know that worked on FULs. That's the only 12 person I could think of.
- 13 Q. Are these other -- now, we've talked a 14 little bit about Exhibit 462 that talks about the 15 Orange Book data. And we talked about the criteria
- already, correct? And now you've identified I think 16
- another criteria, which is to exclude injectable 17
- 18 drugs, right?
- 19 MS. MARTINEZ: Objection, form. 20
 - A. Correct.
- 21 Q. Is that criteria written down anywhere? 22

MR. WINGET-HERNANDEZ: Objection, form.

1 about the Hospital Products Division?

A. Well, typically the list price is -- is

similar, again, to what I described to you to be the

Diagnostics experience. Is when you bring a product

to the marketplace, you determine what that -- what

that price should be, based on a number of different

7 factors. Number of competitors; if there is a

competitive product on the market, where is it priced;

9 what kind of value can we bring that's above and

beyond what the competitor can bring. And if there is 10

any of that, then obviously we believe we could 11

12 offer -- get a premium.

2

3

13 And so you look at all those parameters, 14 and you set a price. And then from that point forward that is typically the list price that you would make 15 adjustments off of. 16

17 Q. When you say "adjustments," do you mean for 18 a contract price?

A. For both contract, CPI increases. 19

20 Q. Did -- was it your understanding that for

21 the Hospital Products Division, that the -- well, let

me ask you this. Let me ask you this first.

Page 88

prices. Although there were some list price sales

2 that were -- that were in that.

But the way we operated our financial planning process, you'd roll all that in. And remember this is a division where 90-plus percent of the revenues come out of the hospital market, and

7 probably 90-plus percent of those revenues come from,

you know, five or six major group purchasing

9 organizations. And so -- but it's -- it's a broad 10 portfolio of products.

And so we typically -- I typically didn't look at list price or individual prices, frankly, very often. You know, there is just too many of them to focus on.

Q. Did you have an understanding as to the volume of sales that Abbott made at list price?

A. I had a general understanding.

Q. What percentage of sales did the Hospital 18

Products division make at list price? 19 20

A. It was a relatively low percent. I'd say something less than a couple of percent. Now, it

varied from time to time because if someone would go

Page 87

1 Did you have any responsibility for either 2 setting, reviewing, or approving list price?

3 A. No.

4 Q. Whose responsibility was that?

5 A. Well, it would have gone up through that

hospital business sector and, you know, typically it

7 would be the senior person in that sector, depending

upon the products.

9 Q. In your role as senior vice president of HPD or president of HPD, did you have an understanding 10

as to the relationship between list price and what

actually was -- Abbott was selling the product for in 12

the market, or the contract price? 13 14

A. Repeat the question one more time.

15 Q. Sure. Let me see if I can streamline it.

Did you have an understanding as to the 16 17 relationship between list price, an HPD products list 18 price, and the contract price, what Abbott was selling

19 it in the marketplace.

A. I'd say the bulk of what I reviewed in our 20

financials would have been actual net revenue for the 21

22 division. So it would primarily have been contract

Page 89 off the market on a certain product, then list price

sales in that product might rise because someone had

to buy, you know, from the competitor.

If the competitor was off the market, so someone had to go in and buy your product at list price, so it probably had little ebbs and flows in it over a period of time, but in general I would say a couple of percent.

Q. Now for that approximate 2 percent market, if you had a competitor, like, for example, for vancomycin, Eli Lilly.

A. Mm-hmm.

13 Q. And Eli Lilly's list price was 25 or 50

percent lower than Abbott's list price, would you 14

15 expect that that -- that individuals or -- or entities

buying at the list price level, meaning they didn't 16

17 have a contract with Abbott, that they would be more

likely to purchase from the competitor with the lower 18

19 list price?

20 A. All things being equal, I would say yes.

But there could be some differentiation between the 21

two products in way of delivery system, the purity of

Page 94

- 1 A. I think as I was describing to you, over
- 2 time you would see, as contract prices go down, okay,
- because of competitive factors, and list price was
- being nominally increased, you would actually -- in
- the hospital market you would actually see some sort
- of a widening gap between those two.
 - And -- and that, in this particular
- business, sometimes happened at a faster pace because
- 9 in the generic injectable business, as new competitors
- enter, sometimes prices, contract prices, can go down 10 more quickly. 11
- 12 Q. If contract price is going down, why would 13 list price continue to go up?
- 14 A. Well, I told you two reasons. One is there
- is a certain amount of sales that do exist at list. 15
- 16 So at the end of the day if someone has to buy our
- product and they're not going to go on contract, you 17
- know, we don't necessarily want to give them a better 18
- 19 deal.

1

7

- 20 Number 2, some contracts had this mechanism
- 21 built into them where list price actually helped you
 - get to that aggregate bundled increase that you were

Page 96

Page 97

- 1 A. Essentially it was the ones I described.
- 2 You know, the big hospital ones are Premier, Novation,
- Consorta, Catholic Group, Tenet, and Columbia/HCA.
- 4 Q. Do you know whether they had alt site 5 components?
- 6 A. If they did, they were relatively small.
- 7 Q. Do you recall ever dealing with them or 8
 - discussing with them their alternate site components?
- 9 A. No.
- 10 Q. Same question for in your role as senior
 - vice president of HPD. What GPOs did you work with?
- A. It roughly would have been the same group. 12
- 13 I'd say more emphasis on Novation and -- Novation and
- 14 Premier.

11

11

- 15 Q. Did you work with any or deal with any GPOs
- on their alternate site needs or market? 16
- 17 A. No.
- 18 Q. In your role either with HP- -- AHD or HPD,
- 19 did you work with Baylor?
- 20 A. Can you be more specific?
- 21 Q. Sure.
 - A. I want to make sure I answer it accurately.

- allowed to take in those contracts.
- 2 Q. Okay. At any time in your -- well, let me
- 3 ask you this. Let's round this out.
- 4 Did you review the catalog list prices
- before they were published in your capacity as Abbott
- -- as senior vice president for HPD?
- 7 A. No.
- 8 Q. Did you review any contract pricing?
- A. Individual product pricing? 9
- Q. Or, you know, product lines. 10
- A. I would have reviewed, as an example, the 11
- aggregate proposal to a large GPO, as an example. Not 12
- 13 the individual pricing, but I would look at, you know,
- if we sold X millions of dollars to the GPO last year, 14
- 15 what is the contract that we're offering this year and
- 16 what's the relative difference between those. Not
- individual prices, but it would actually be what the 17
- 18 overall contract was being offered, the value of that
- 19 contract. I would have reviewed that.
- 20 Q. I don't think I asked you this question
- 21 before. What GPOs did you work with when you were
- 22 with AHD?

202-220-4158

- 1 Q. Did -- Baylor is in Texas; right?
- 2 A. I know where it's at.
 - Q. Okay. Well, did you sell to Baylor when
- you -- earlier in your career, when you were --
- 5 A. No. No.
- 6 Q. Okay. Had a large -- it has a large health
- 7 system in Texas; is that fair?
- 8 A. Mm-hmm.
 - Q. Did you work with Baylor or the Baylor
- account or any component of the Baylor account? 10
 - A. I mean, I visited Baylor in some capacity.
- I'm trying to remember where. 12
- 13 And the reason why I was being a little
- more cautious is you probably know Boone Powell was on 14
- 15 our board, who was the CEO of Baylor for a period of
- 16 time. So obviously I interacted with Boone.
- 17 O. Okay.
- 18 A. But did -- did I actually do any kind of
- 19 contract negotiations? Is that what you're asking?
- Q. Yeah. 20
- 21 A. The answer is no.
- 22 Q. Okay. What about -- maybe not necessarily

- 1 You can go ahead and answer that if you have an
- 2 answer.
- 3 THE WITNESS: My basic understanding of the
- 4 Ross issue was one around bundling the disposable and
- 5 the device together.

6

- 7 BY MS. ST. PETER-GRIFFITH:
 - Q. Do you -- did you have an understanding as
- 9 to whether or not Ross was providing free devices to
- 10 entities?
- 11 A. I think that is the bundling issue --
- 12 Q. Okay.
- 13 A. (Continuing) -- in and of itself.
- Q. If Abbott home infusion was providing
- 15 product basically free of charge, without -- without
- 16 charging fair market value for the product, for the
- devices, do you see a parallel between the two -- you
- 18 know, the two conduct -- the conduct between Ross and
- 19 home infusion?
- 20 A. No.
- Q. How come?
- A. Because in the Ross situation, at least as

Page 172

- 1 president of HPD would you expect that that's
- 2 something that you would learn about?
- A. I would expect that either I'd learn about it or get some level of legal review to determine the validity of it.
 - Q. Do you know whether that ever took place?
 - A. I've already testified I didn't know that there were any.
- 9 Q. Why did you make the decision to close the 10 home infusion business unit?
 - A. We did an analysis of -- of that particular
- 12 business to look at whether or not it -- it fit in the
- portfolio for where we wanted to take HPD, and, No. 2,
- 14 whether or not it was a reasonable business to be in
- 15 the portfolio. And this happened relatively early on
- 16 in my tenure as the president of HPD. So sometime I'd
- 17 say late '98, early '99 kind of time frame.

And we made the determination that if you

- 19 looked at the business and you fully burdened it,
- 20 it -- it had at best marginal profitability. I think
- 21 you could probably argue it lost money. But at best
- 22 probably marginal profitability.

Page 171

- I understand it, we were charging for the disposable
- 2 and capturing a portion of that disposable cost to
- 3 offset the cost of the pump. That has nothing to do
- 4 with consignment.
- 5 Q. Okay. But if no fair market value was
- charged under these consignment arrangements, how does
- 7 Abbott's -- how would Abbott's home infusion
- 8 department identify what they actually charged for the
- $\,9\,$ $\,$ product, or whether or not they were actually charging
- 10 anything for the product?
- 11 A. I -- unless I looked at the detail of it, I
- 12 can't answer your question.
- Q. Did anyone raise -- ever raise any concerns
- 14 about -- with you or anyone, to your knowledge, within
- 15 Hospital Products Division with the legality of the
- 16 home infusion business model?
- 17 A. No.
- Q. Did you ever hear of any customers raising
- 19 legal concerns about the home infusion business model?
- 20 A. No.
- Q. If customers had raised concerns about the
- 22 legality of the home infusion business model, as

Page 173

- 1 It clearly was more of a service-oriented 2 business than a product business, and we were -- we
- 3 were trying to take the business with us into more
- 4 differentiated kinds of products. So it didn't fit
- 5 strategically where we wanted to go. And so I made
 - the decision we should -- we should shut it down.
- Q. Do you know what Don Robertson's position
 was with regard to whether or not the business should
- 9 be shut down?
- A. I don't recall specifically Don Robertson's position, but there were -- there were people within
- 12 the group that had a different point of view.
- 13 Q. Who? Who?
- 14 A. Well, I think Mike Sellers to some extent
- 15 had a different point of view. They were typically
- 16 the people who were involved in the business.
- Q. Do you recall what Mike Sellers' objections was to closing?
- 19 A. Well, the areas that he agreed were
- 20 obviously the profitability side of it.
- I think the concern was some of these
- 22 customers were large hospital customers who we were
